A Note About Flex Time

Flex Time at Incarnate Word Academy is a purposeful period at the end of the school day that provides a space for students to connect with their teachers, engage with their peers and participate in enriching activities. During Flex, teachers are available for extra assistance and support. Additionally, this is a time for students to make-up formative assessments in a quiet space. *We ask that students not be signed out early during Flex*. In the event your daughter needs to leave early, please communicate with your daughter where she will be oncampus so we can maintain minimal disruption to the learning environment. We appreciate your support in this matter.

Class Spotlight: Honors Geometry

Geometry is a required course for all IWA students. Students in our Honors Geometry course have either qualified for it with their grade from Algebra I or were placed in the class based on their scores on the incoming freshman placement exam.

"A lot of people associate geometry with shapes and proofs and it is a course that pushes the student to think differently about math," said Mrs. Kristan Siegal, who teacher Honors Geometry. "I enjoy the course because most people don't. I enjoy making geometry fun and hands-on to help students experience the lessons to help change the way people view geometry and math in general."

This week, Siegel made a coordinate grid on the floor and had students move around as though they were points on the graph. "This helps students go from simply memorizing the relationships and formulas to truly understanding the mathematical relationships," she said. "The students have said that this activity helps them better visualize what happens when figures are reflected or translated instead of just memorizing the formulas."

Fall Choir Concert Update

Our annual Fall Choir Concert is scheduled for Oct. 7. Should the Astros have a playoff game that evening, the concert will be postponed until Monday, Oct. 11.

IWA Snapshots

We stopped into Mrs. Rachael Valka's Theology III class this week, where she and her students were taking part in a "baptism lab." Trough discussions and hands-on activities, students learned about the rite, necessity and effects of baptism. They walked through the rite of baptism with a doll, as well as taking part in a science experiment with iodine and bleach that showcased how sin stains us and how, through the grace of baptism, our souls are cleansed.
